FOR IMMEDIATE RELEASE

Cover Three Times The Ground With The Moultrie Panoramic 180i Game Cam

Birmingham, AL – Moultrie Products®, LLC, the leader in game camera design and innovation, introduces a game camera with a full 180-degree field-of-view, the Panoramic-180i™.

Without a camera on every tree, hunters are left to wonder what goes unseen on their hunting property just out of the range of their game cams. And while hanging a camera on every tree is unrealistic, it is completely realistic for hunters to cover 3 times more ground with the expansive viewing capacity of the Panoramic-180i game cam. It's literally like having 3 cameras in 1.

With unmatched performance and functionality, the Panoramic-180i includes iNVISIBLE IR illumination and no moving parts for aggressive yet completely silent surveillance—day or night. In addition, it runs on AA batteries for added convenience and reduced cost of operation.

Highlighted Panoramic-180i Features:

- 14 MP resolution
- Less than 0.5-second trigger speed
- 70-foot flash range
- 15,000 images on 12 AA batteries
- iNVISIBLE 940nm IR LED flash technology
- Mossy Oak Country camo
- HD video
- Moultrie Mobile Compatible

MSRP for the Moultrie P-180i game camera is \$299.99.

For more information about the Panoramic-180i or any other Moultrie products, contact Glenn Walker at glenn@providencemarketinggroup.net or visit www.moultriefeders.com.
