FOR IMMEDIATE RELEASE

Moultrie Sets the Bar...Again

New M-1100i Game Camera Leaves the Competition Behind

Alabaster, Alabama – Moultrie Products, LLC announces the arrival of the M-1100i No-Glow game camera for those hunters looking to take their scouting abilities to new levels. The M-1100i is packed with innovative features that make it the most advanced mini-cam to hit the woods.

Moultrie has pulled out all the stops and incorporated “invisible” NO-GLOW illumination, a 2-inch color preview screen, and an ultra-high-end image processor that will deliver full 1080p HD video with sound and superior photos for seasons to come. The combination of the M-1100i’s half-second trigger speed, 80-foot night range and 12 megapixel resolution allows the user to capture incredible photos and videos of any wild game. The M-1100i sports a battery life of 10,000 images on 8 AA batteries and Moultrie’s “Managed Memory” feature, which is capable of dismissing old images in order to record new when the SD card is full.

Moultrie has certainly hit a homerun with the M-1100i game camera. This scouting tool has all the features a serious outdoorsman could want. It’s time to increase your chances this season and experience what Moultrie’s all new M-1100i has to offer.
