FOR IMMEDIATE RELEASE

Sit High, Sit Comfortably With The Summit Treestands Sentry SD

Birmingham, AL — Summit Treestands®, the industry leader in producing innovative and cutting-edge methods for hunting from an elevated position, adds the Sentry SD to its diverse lineup of climbing stands.

The new Summit Sentry SD is a must-have tool in the possession of any serious bowhunter, highlighted by the new mesh flip-up seat that sets it apart from the other climbers in the Summit arsenal in both innovation and comfort.

Beginning with a design similar to the popular Viper SD, Summit redesigned the Sentry from the platform up and added the new seat design to make its comfort unparalleled. Built around the goal of making climbing as quick, silent and easy as possible, the stand allows hunters to sit high enough that shooting from a sitting position is as comfortable as shooting while standing.

And to make the Sentry SD as diverse as possible, it comes available in both an open- and closed-front option.

Sentry SD Specifications:

Weight: 23 pounds/closed front; 21 pounds/open front

Weight Capacity: 300 pounds

Platform Size: 20 inches by 30 inches

Seat: Contoured mesh folder

Seat Size: 18 inches by 16 inches

MAP: Open Front: \$269.99/ Closed Front: \$289.99

About Summit Treestands

Summit treestands are carefully engineered to be the most silent, secure, comfortable and concealed treestands on the market. All Summit stands are designed and engineered to meet or exceed standards set by the Treestand Manufacturers Association. At Summit, we don't just build 'em, we use 'em. We don't just build stands we think will work—we build stands we know will work.
