**MATHEWS® INTRODUCES NEW HIGH SPEED MONSTER® WAKE™**

**Sparta, Wisconsin**— On the heels of the ground-breaking release of the NO CAM ST™ Technology, Mathews® Archery, Inc. is excited to introduce the McPherson Series® Monster® Wake™.

Built to deliver raw speed, the all-new Monster® Wake™ is a powerful dual-cam bow built with the patented Perimeter Weighted AVS® DYAD™ eccentric system. Featuring incredibly tight tolerances, the all-new riser and limb configuration make it a more stable shooting platform. With power to spare, the new Wake™ delivers speeds up to 355 fps at 75% let-off and 352 fps at 85%.

“For those looking for the highest quality and most innovative *speed* bow in the world, the Wake certainly fits the bill,” stated Mathews CEO and Founder, Matt McPherson. “At 352 fps, it is the fastest 85% let-off bow and is just a pleasure to shoot.”
